- Time Management
- Creativity
- Problem Solving
- Responsive Design
- Collaborative (Team Work)

About Me

As a student with a strong passion for Front End Development, I possess excellent time management skills and a high enthusiasm for learning new technologies. While I am still relatively new to the field and in the process of exploring its vast opportunities, I find great joy in creating visually appealing and functional user interfaces. I firmly believe that each project presents a valuable opportunity for growth and skill development.

PROJECT

CekSaku

Financial Management Website

Nov 2024 - now
